OUR BUSINESS

OUR HEART

OUR FACE

OUR VOICE

OUR BUSINESS

Syntra Refining Corp is the industrial backbone of the North American battery supply chain. We are done talking about the lab We have moved beyond the 'lab scale' to build a decentralized network of smart refining hubs.

~~Syntra represents the shift from a "science project" to a critical infrastructure utility. We do not beg for funding; we demonstrate capacity and confidence. Our brand projects the stability, certainty, advanced technology and operational discipline of a company that manages Class 9 hazardous materials and billion-dollar commercial contracts.~~

NO PITCHING

HOW WE POSITION OURSELVES

We are a ~~technology company~~ refining pure-grade critical minerals from mineral concentrates and electronic waste. Secondary sources like batteries

Our unprecedented refining infrastructure is 8x more capital efficient than traditional methods, and our innovation features:

- SYNHUB™ - our network of feedstock agnostic, multi-metal refining facilities
- Unmatched recovery efficiency with proprietary AI-driven SYNCORE™ technology
- Responsible & sustainable process: no toxic chemicals; zero liquid discharge

LOVE THIS!! :)

WHAT WE DO

- We *RECOVER* critical minerals from end of life batteries, mine tailings and low grade mineral ores.
- We *REFINE* aluminum, cobalt, copper, lithium, nickel and manganese.
- We *SELL* ready-to-use, battery-grade energy minerals

HOW WE ARE STRUCTURED

We utilize a *hybrid house* architecture to define the operator from the technology.

The Corporate Entity: **Syntra Refining Corp.** → The operator and asset owner: buys feedstock, operates refineries, sells battery-grade minerals,
*Commercial, institutional

The Facility Brand: **SYNHUB™** → The physical infrastructure node
*Modular, rapid deployment

The Technology Brand: **SYNCORE™** → Our IP: the AI-driven process logic that enables our feedstock agnosticism and Zero Liquid Discharge (ZLD) promise
*Highly technical, precise, trade secret

LOVE!

OUR BUSINESS

OUR HEART

OUR FACE

OUR VOICE

OUR HEART

OUR VALUES

Innovation. Integrity. Excellence. Partnership. Impact. Stewardship.
(alternates: Research. Transparency. Collaboration. Education. Responsibility)

OUR ETHOS

We are replacing our start-up grit with the discipline of a credible, established scale-up where:

- Systems replace heroics;
- Repeatability replaces hustle;
- Consistency replaces sprints;
- Execution replaces ambition; and,
- Governance paves the way for operational excellence and security.

OUR POSITIONING STATEMENT

Smart Refining. Universal Intake. Distributed Network.

OUR MANIFESTO

We are dedicated to advanced chemistry and world-class engineering -- without both, we cannot realize our mission.
We prioritize environmental stewardship.
We never solve a problem that creates another one.
We are here to revolutionize the critical mineral landscape.
We are not afraid of competition. In fact we welcome more players in the space. Critical mineral refining infrastructure capacity is a massive problem with immeasurable destruction if it cannot be solved. The more clean, efficient refineries working to solve this problem, the better our world will be.
And *that* is our ultimate mission.

What is the
road for scalability??

Evolution?

precision

SIGNATURE BRAND ELEMENTS

Wordmark: SYNTRA in our logo and wordmark is always capitalized. Within a body of writing, use “Syntra”.

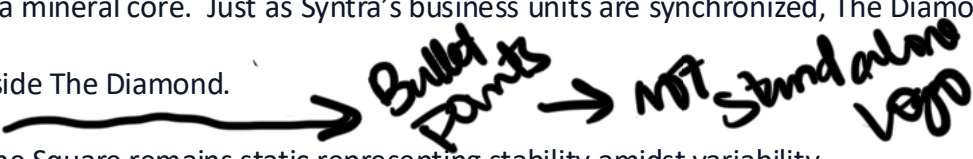

The Square: We choose hard, right angles and sharp corners over circular shapes or curved edges to symbolize acuteness, precision, definition and scientific proficiency. The square’s perfect symmetry reflects the exactness and perfection of our chemistry. We don’t outline The Square – it is one uniform color to reflect Syntra’s consistency. We use a square period instead of a circular period in our logo and design features.

The Diamond: An adaptation of the square’s right angles and sharp corners, The Diamond around The Square is Syntra’s iconic logo. The Diamond represents protection, durability, and longevity. This signals Syntra as a permanent establishment in the critical mineral refining industry, and symbolizes our IP fortress and IT security protecting the nucleus of the organization. Further, it is symbolic of a protective layer around a core – much like the IP fortress and IT security protecting the nucleus of the organization; like the surface layers protecting a mineral core. Just as Syntra’s business units are synchronized, The Diamond and The Square are always the same color.

The Square may be displayed on its own, or inside The Diamond.

The Diamond is never used on its own.

When animated, The Diamond rotates while The Square remains static representing stability amidst variability.

Text alignment: Our writing is always left-aligned, not centered. This is reflected in our written artifacts, our website design, and marketing collateral. This contributes to a sharp and precise look and feel; this is demonstrating science over art.

Icons: In our decks and outward-facing marketing collateral, we use sophisticated, unicolor icons to help illustrate, categorize and distinguish key business elements

Chicken Wire texture: Represents the connectivity of our distributed network and structure of our crystallization lattice. Use this subtle technical grid overlay (15% opacity) on backgrounds for marketing materials and approved written artifacts and collateral.

SYNCORE™: The Technology Brand

SYNCORE™ refers to our signature, proprietary refining technology and can be referred to as SYNCORE™, our SYNCORE™ system, or our SYNCORE™ technology. SYNCORE is always fully capitalized with the trademark symbol following.

SYNHUB™:The Facility Brand

SYNHUB™ is always fully capitalized with the trademark symbol following when we are referring to a facility. If we are talking generally about facilities, you can say “our Synhubs” or “Syntra’s Synhubs”. Each facility will be named by location in the following manner: SYNHUB™ Location.

OUR COLOUR PALETTE – Primary Brand Colors

Signal Yellow: Our core identity colour, representing energy, alertness, and the valuable core extracted from the ore.

Midnight Navy: Our core compliment color used in our logo and as a dark background.

Slate-50: Clinical and clean, we use white where emphasis in text or design is required, otherwise white-adjacent Slate-50 is our primary choice.

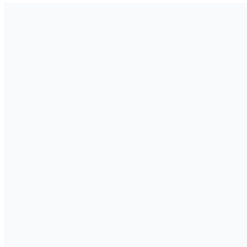

Deep Slate: Our black-adjacent brand color. Where black is generic and common, Deep Slate is a subtle nod to Syntra’s individualism.

#FFFFFF

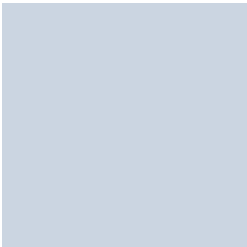

OUR COLOUR PALETTE – Secondary Brand Colors

The following colors are used as text and design accents where variety in color is a discernable advantage and enhances organization of information or clarity in a visual graphic or asset.

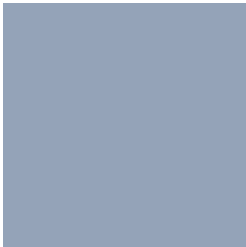

Design note: the blue should be used sparingly, where simple contrast offers significant improvement ie. small text, page numbers, subheading, category.

OUR BUSINESS

OUR HEART

OUR FACE

OUR VOICE

OUR VOICE

Syntra Refining is not asking for permission; we are already building the infrastructure the market desperately needs. Our writing style reflects a company that is established, open for business, technologically superior and institutionally backed.

WRITING GUIDE

We stay in the affirmative; we don't state what we are not nor what we used to be. .

Ex: "We are operators building repeatable systems, not research experiments" becomes "We are building repeatable systems".

"We operate a distributed network" > "We are a centralized solution"

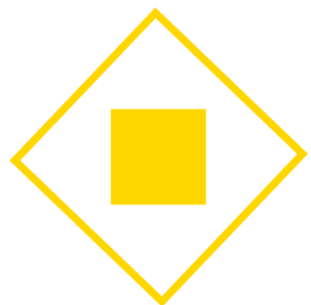

"Feedstock agnostic" > "We process anything"

Our language establishes confidence, trust and credibility.

We don't say that we are deep tech, we *act* deep tech.

We do label ourselves as a technology company as a means to clarify that we are not a "mining company".

We don't reference what we used to do, we state what we *are* currently doing.
